

MUHAMMED RAHEES N

Software Developer — Python Developer — Data Analytics Enthusiast

Malappuram, Kerala | +91 8089048581 | raheesnelliyali01@gmail.com | [linkedin.com](https://www.linkedin.com) | github.com | [raheesportfolio](https://raheesportfolio.com)

Professional Summary

Detail-oriented BCA student with strong foundations in Python, FastAPI, SQL, React, and Data Analytics. Proven experience in designing RESTful APIs, relational schema modeling, and interactive user interfaces through hands-on internship experience and project implementations. Adept at turning functional requirements into scalable web applications and automated data workflows.

Education

Safa College of Arts & Science, University of Calicut

Bachelor of Computer Applications (BCA)

Expected 2028

Current CGPA: 7.1

Experience

Bridgeon Technologies

May 2026 – June 2026

Python FastAPI Intern

Calicut, Kerala

- Architected and tested high-performance asynchronous REST APIs using FastAPI and Python.
- Implemented relational data persistence and optimized CRUD workflows utilizing SQLite and SQLAlchemy.
- Enforced strict request/response data validation via Pydantic schemas and documented endpoints via Swagger UI.
- Collaborated in an agile workflow, conducting code reviews and adhering to clean code and backend modular design principles.

Real Build Hub

2025 – Present

Business Operations & Digital Support

Kerala

- Streamlined operational reporting workflows by building automated Excel tracker templates for invoices and expenditures.
- Organized business datasets to generate actionable reporting insights and improve daily operational efficiency.
- Managed business documentation, digital visibility assets, and customer-facing communication channels.

Projects

Task Management System | *FastAPI, Streamlit, SQLite, Pydantic, Python*

- **Demo:** github.com/raheesnelliyali-in/task-management
- Engineered a modular task tracker supporting full CRUD operations, priority filtering, and status workflows.
- Constructed an interactive frontend using Streamlit connected via HTTP client requests to a FastAPI backend service.
- Implemented SQLite database schemas with structured query execution for low-latency task retrieval.

Veloura Clothing E-Commerce Website | *React, FastAPI, SQLite, Tailwind CSS*

- **Demo:** [veloura-clothing](https://veloura-clothing.com)
- Developed a full-stack e-commerce web platform featuring dynamic catalog filtering, cart persistence, and order dispatch workflows.
- Designed responsive UI components in React and Tailwind CSS, interfacing directly with custom RESTful backend endpoints.
- Built relational database schemas to manage product inventories, pricing structures, and order tracking.

Personal Developer Portfolio | *React, Tailwind CSS, Vite, Vercel*

- **Demo:** [raheesportfolio](https://raheesportfolio.com)
- Designed and deployed a modern, responsive web portfolio to showcase full-stack projects, technical skillsets, and contact channels.
- Integrated seamless cross-device navigation, direct resume access, and project demonstrations optimized with Vite build tooling.

Technical Skills

Languages: Python, JavaScript, SQL, HTML5, CSS3

Backend & Frameworks: FastAPI, RESTful APIs, Pydantic, Swagger UI/OpenAPI

Frontend Development: React, Tailwind CSS, Vite

Databases & Storage: SQLite, MySQL, Relational Schema Design

Data Analytics & BI: Microsoft Excel (VLOOKUP, Pivot Tables), Power BI, Data Cleaning, Data Visualization

Developer Tools & Platforms: Git, GitHub, Postman, VS Code, Vercel, Render

Certifications

- Artificial Intelligence Course (30 Hours) – TechySpot, March 2025
